ABSTRACT

The abstract must be limited to one paragraph.

Keywords First keyword · Second keyword · More

1 Introduction

Papers to be submitted to the International Conference on Scientific Computing and Machine Learning 2025 (henceforth referred to as SCML2025) must be prepared using the SCML \LaTeX style file, which is available from the SCML2025 website:

<http://www.scml.jp/>

Submitted papers should not exceed four pages, excluding references, acknowledgments and supplementary materials. Papers that exceed four pages will not be reviewed, or in any other way considered for presentation at the conference.

Submitted papers will be reviewed by the Program Committee. All accepted papers will be made available to conference participants. However, authors of accepted papers can choose whether to include their paper in the conference proceedings and make it public, or keep it non-public (and hence non-archival). If they choose to keep it non-public (and non-archival), the authors retain the right to publish the paper elsewhere.

Submission of papers that are under review or have been recently published in a conference or a journal is allowed; but, in that case, these papers cannot be included in the conference proceedings.

2 Authors

Submitted papers are reviewed using a single-blind review process: authors declare their names, affiliations and

*Use footnote for providing further information about author (webpage, alternative address)—*not* for acknowledging funding agencies.

emails in the manuscript for the reviewers to see. The names of the authors should be listed starting from left to right and then moving down to the next line.

3 Abstract and Keywords

The abstract must be limited to one paragraph. Please provide at least two keywords. Each keyword should be given in lowercase letters except for proper nouns and acronyms.

4 Headings

Please capitalize the first letter of the first word and any proper nouns.

5 Tables

All tables must be centered. The table number and the title must be placed before the table. See Table 1.

Table 1: Sample table title

Part		
Name	Description	Size (μm)
Dendrite	Input terminal	~ 100
Axon	Output terminal	~ 10
Soma	Cell body	up to 10^6

Figure 1: Sample figure caption.

6 Figures

Figures must be of sufficient resolution; however, please be careful that the file size is not unnecessarily large. To save space in the manuscript, the use of the wrapfigure environment is allowed. See Figure 1 for example.

7 References and Citations

References must include page numbers whenever possible and be as complete as possible. Any choice of citation style is acceptable as long as consistent.

8 Supplementary Material

Authors can optionally provide extra information such as complete proofs and additional experiments in the appendix. In such cases, the appendix must be placed after References. Please use the title “Appendix: Title” if the manuscript contains only one appendix, and “Appendix A: Title”, “Appendix B: Title”... if more than one appendices are contained.

Acknowledgments

All sources of funding should be disclosed. Please avoid using footnote for acknowledging funding agencies.
